3. General Education Task Force

The General Education Task Force launched their effort to examine and make recommendations for the General Education program by working with Dr. Paul Hanstedt on the 18th and 19th. Examination of our current General Education program was initiated. Representatives from the General Education Committee who are serving on the Task Force shared their draft of the mission and learning outcomes for the General Education Program. Different General Education models were explored. In addition to Dr. Hanstedt's book being available online through the library, Dr. Hanstedt's presentations were videotaped. A link to the videos will be available soon through the Academic Affairs website. The Task Force recommends both of these to WOU faculty interested in learning more about different General Education models.
